

Sprint #3 Report

CSE 115a – *Eco-Connect*

Eco-Tech Team 07/15/24

Actions to stop doing: "What things should we stop doing?"

- Having loose commitments to the daily scrum meetings.
 - Undermines the productivity of the meeting if not everyone is present.

Actions to start doing: "What things should we start doing?"

- Implementing unit tests earlier to be able to consider a task done.
 - See the progress of the sprint more consistently once a task is considered done.
- Consistent work sessions with other team members.
 - Collaboration in order to work through any implementation issues.

Actions to keep doing: "What is working well that we should continue to do?"

- Frequent communication about implementation plans.
 - Team knows what everyone is working on on a more frequent basis than just at the scrum meetings.
- Clarifying product design from the product owner before beginning work on the task.
 - Gives the team members a better understanding of what they need to do in the upcoming sprint.
- Utilizing our scrum retrospective in order to inform our next sprint plan accordingly.
 - Provides the opportunity to learn from the previous sprint to have a more successful next one.
- Frequent updates to github.
 - Keeps team members more informed on what has been done/ to what capacity and how to implement other dependent parts of the feature.
